## GOLD AND SILVER LEAF

Metallic leaves in gold, silver, copper and verdigris finishes are hand applied using the age old process of gilding. These metal leaves can provide a timeless quality for both large scale projects in hotels, casinos and restaurants, along with enriching the interiors of many homes.

Using only the finest quality metals form around the world, we have a long tradition in this delicate application that gives a rich and spectacular lustre to ceilings, walls, joinery, furniture and lighting.

Whether recreating ancient scenes or invigorating modern design, all of our leaf finishes are applied and finished with precision so that they continue to look spectacular well into the future. Bishop Decorative Finishes applied all gold leaf to Melbourne's Crown Casino.
